INTRODUCTION

1.ABOUT THE PROJECT

As we all know the student life of every person is very eventful. We participate in many events such as blood donation camps, hackathons, tree plantations, cultural events, and many more. But many of the students lack awareness of the happening of the events or do not get the registration forms on time. Thus sometimes the organizers complain about the low number of participants.

As an effort to solve this problem we have come up with an idea of an event organization website for colleges.

2. ABOUT THE WEBSITE

This website supports two types of users:

a.Host: for people who would like to host events and ask students for volunteering and participation.

b. Student: for people who are eager to learn and participate in events.

Functionalities under Student login

- i. Can register for Events (like campaigns, webinar) through the online application form
- ii. Displaying the list of Events registered

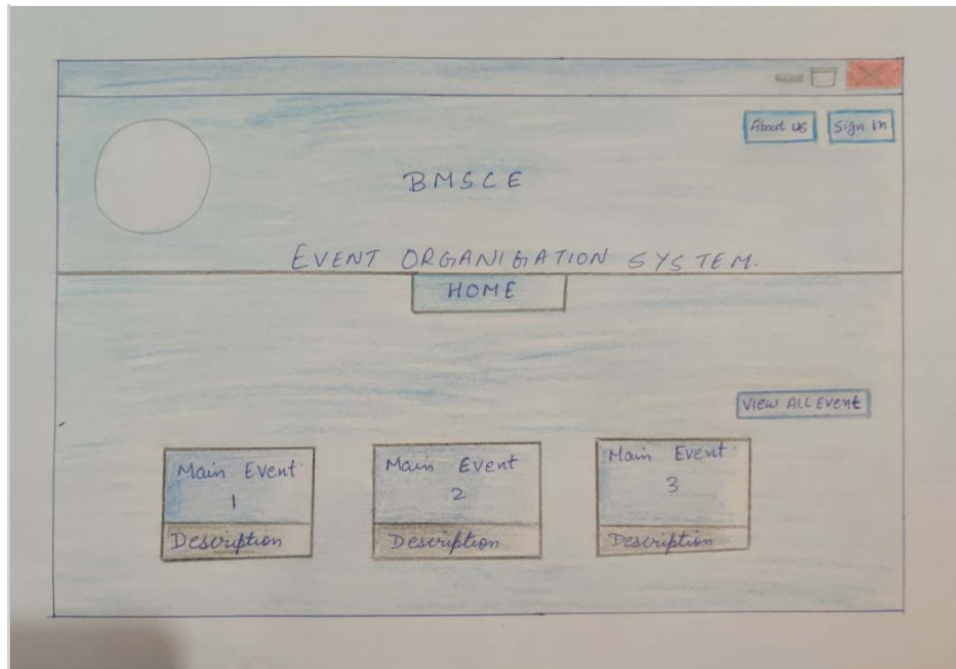

Functionalities under Host login

- i. Creating an event
- ii. Specify requirements for registration
- iii. View additional information about their events (hosted in the past)

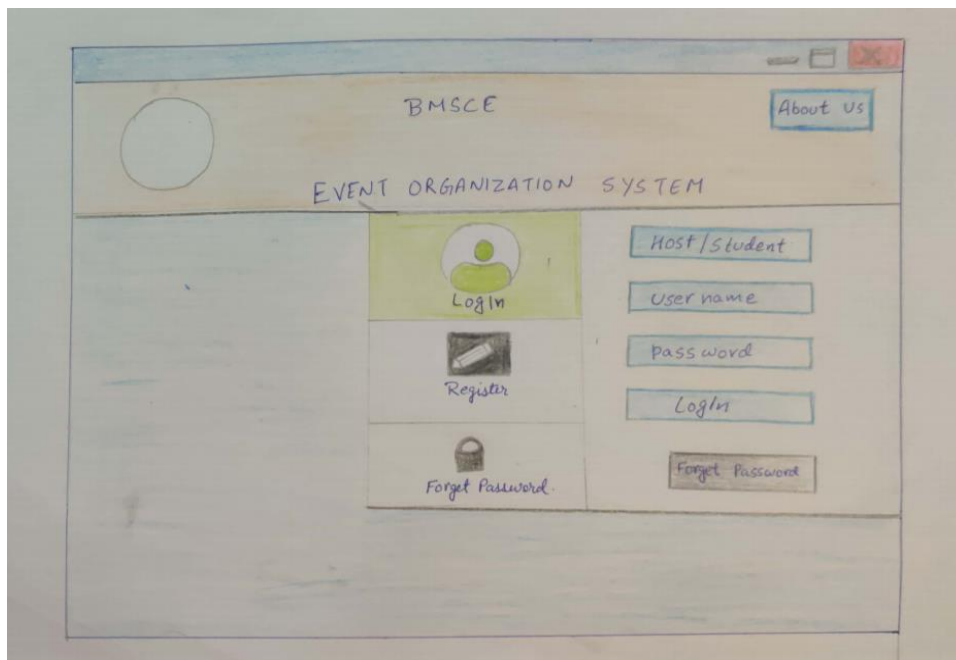

Additionally, there is a separate page for events where one can view upcoming events and get the registration forms for them.

About Us

Our event website works as the online representative for your event.

Not only is it the official point of contact for you and your attendees, it is also a reflection of what your event is all about and the ideologies guiding it.

OUR MISSION

- Increase Students participation..**
Our event website is the main source to provide attendees with event info, sessions, speakers, agenda, and more.
- Introducing new and challenging ideas.**
Attendees learn everything they need to know about the meeting or event, and in turn, you gather everything needed to carry it out with digital ease.
- Education, training and volunteering programmes.**
Attendees need to receive a lot of data that will be important for making the most of the event. The registration specifics, fees, schedule, venue map, dates, types of activities, biographies of speakers, etc. will all matter.
